## **Innovations in Satellite Communication and Satellite Technology** Daniel Minoli

**Surveys key advances in commercial satellite communications and what might be the implications and/or opportunities for end-users and service providers in utilizing the latest fast-evolving innovations in this field**

This book explores the evolving technical options and opportunities of satellite networks. Designed to be a self-contained reference, the book includes background technical material in an introductory chapter that will serve as a primer to satellite communications. The text discusses advances in modulation techniques, such as DBV-S2 extensions (DVS-S2X); spotbeam-based geosynchronous and medium earth orbit High Throughput Satellite (HTS) technologies and Internet applications; enhanced mobility services with aeronautical and maritime applications; Machine to Machine (M2M) satellite applications; emerging ultra HD technologies; and electric propulsion. The author surveys the latest innovations and service strategies and the resulting implications, which involves:

- Discussing advances in modulation techniques and HTS spotbeam technologies
- Surveying emerging high speed aeronautical mobility services and maritime and other terrestrial mobility services
- Assessing M2M (machine-to-machine) applications, emerging Ultra HD video technologies and new space technology

Satellite communication is an integral part of the larger fields of commercial, television/media, government, and military communications, because of its multicast/broadcast capabilities, mobility, reliability, and global reach. High Throughput Satellites (HTS) are expected to revolutionize the field during this decade, providing very high speed, yet cost-effective, Internet access and connectivity anywhere in the world, in rural areas, in the air, and at sea. M2M connectivity, enabled by satellite communications, connects trucks on transcontinental trips, aircraft in real-time-telemetry aggregation, and mercantile ships.

A comprehensive analysis of the new advances in satellite communications, *Innovations in Satellite Communications Technology* is a reference for telecommunications and satellite providers and end-users, technology investors, logistic professionals, and more.

#### **From reader reviews:**

##### **Robert Caceres:**

Do you have favorite book? When you have, what is your favorite's book? Reserve is very important thing for us to find out everything in the world. Each publication has different aim or maybe goal; it means that reserve has different type. Some people feel enjoy to spend their the perfect time to read a book. They may be reading whatever they acquire because their hobby is actually reading a book. Why not the person who don't like reading through a book? Sometime, particular person feel need book when they found difficult problem as well as exercise. Well, probably you will want this Innovations in Satellite Communication and Satellite Technology.

##### **Ralph Humphries:**

The book Innovations in Satellite Communication and Satellite Technology can give more knowledge and also the precise product information about everything you want. So just why must we leave the best thing like a book Innovations in Satellite Communication and Satellite Technology? Several of you have a different opinion about reserve. But one aim in which book can give many facts for us. It is absolutely appropriate. Right now, try to closer with your book. Knowledge or data that you take for that, you could give for each other; you are able to share all of these. Book Innovations in Satellite Communication and Satellite Technology has simple shape but the truth is know: it has great and large function for you. You can appearance the enormous world by start and read a guide. So it is very wonderful.

##### **Charlotte Bernstein:**

Do you considered one of people who can't read gratifying if the sentence chained inside straightway, hold on guys this specific aren't like that. This Innovations in Satellite Communication and Satellite Technology book is readable through you who hate those straight word style. You will find the information here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to offer to you. The writer connected with Innovations in Satellite Communication and Satellite Technology content conveys the idea easily to understand by a lot of people. The printed and e-book are not different in the content but it just different such as it. So , do you nevertheless thinking Innovations in Satellite Communication and Satellite Technology is not loveable to be your top collection reading book?

##### **Mark Klein:**

Reading a book to get new life style in this yr; every people loves to examine a book. When you examine a book you can get a great deal of benefit. When you read publications, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your study, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these us novel, comics, as well as soon. The Innovations in Satellite Communication and Satellite Technology will give you new experience in examining

a book.
