Adapting Buildings and Cities for Climate Change

David Crichton, Fergus Nicol, Sue Roaf

Adapting Buildings and Cities for Climate Change David Crichton, Fergus Nicol, Sue Roaf

From the bestselling author of Ecohouse, this fully revised edition of Adapting Buildings and Cities for Climate Change provides unique insights into how we can protect our buildings, cities, infra-structures and lifestyles against risks associated with extreme weather and related social, economic and energy events.

Three new chapters present evidence of escalating rates of environmental change. The authors explore the growing urgency for mitigation and adaptation responses that deal with the resulting challenges.

- Theoretical information sits alongside practical design guidelines, so architects, designers and planners can not only see clearly what problems they face, but also find the solutions they need, in order to respond to power and water supply needs.
- Considers use of materials, structures, site issues and planning in order to provide design solutions.
- Examines recent climate events in the US and UK and looks at how architecture was successful or not in preventing building damage.

Adapting Buildings and Cities for Climate Change is an essential source, not just for architects, engineers and planners facing the challenges of designing our building for a changing climate, but also for everyone involved in their production and use.

From reader reviews:

Mike Jones:

This Adapting Buildings and Cities for Climate Change book is not really ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is usually information inside this book incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. That Adapting Buildings and Cities for Climate Change without we understand teach the one who examining it become critical in thinking and analyzing. Don't become worry Adapting Buildings and Cities for Climate Change can bring once you are and not make your case space or bookshelves' become full because you can have it inside your lovely laptop even cell phone. This Adapting Buildings and Cities for Climate Change having excellent arrangement in word and layout, so you will not truly feel uninterested in reading.

Numbers Harless:

Many people spending their period by playing outside using friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to spend your whole day by examining a book. Ugh, do you consider reading a book can really hard because you have to accept the book everywhere? It alright you can have the e-book, taking everywhere you want in your Touch screen phone. Like Adapting Buildings and Cities for Climate Change which is finding the e-book version. So , try out this book? Let's observe.

Bonnie Mentzer:

As a scholar exactly feel bored for you to reading. If their teacher questioned them to go to the library or even make summary for some guide, they are complained. Just little students that has reading's heart and soul or real their interest. They just do what the professor want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading through is not important, boring and also can't see colorful images on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Adapting Buildings and Cities for Climate Change can make you sense more interested to read.

Harold Riggs:

What is your hobby? Have you heard that will question when you got students? We believe that that problem was given by teacher for their students. Many kinds of hobby, All people has different hobby. And you also know that little person just like reading or as studying become their hobby. You should know that reading is very important in addition to book as to be the matter. Book is important thing to increase you knowledge, except your teacher or lecturer. You get good news or update in relation to something by book. Different categories of books that can you go onto be your object. One of them is Adapting Buildings and Cities for Climate Change.
