David McCullough tells the story-behind-the-story of 2 brothers illuminating the world about flying machines - Wilbur and Orville Wright. Two-time winner of the Pulitzer Prize, the author is a master in writing narrative history.

This book is for people who are in need of a not so self-help-like book but can really push them to the extent of their optimism. A fancy read for children because of the touch adventure in stored, bicycle and aviation mechanics and experiments. The story of building a plane, watching birds all day, cracking the code of aeronautics by balmy yet very bright brothers and changing the world.

The way McCullough wrote this piece left a great image for the Wright Brothers. They are people who are modest and never boastful—the kind of people everyone should look up to. Ordinary brothers with great minds started from scratch and ended up with a phenomenal history.
