## **Explanation in Causal Inference: Methods for Mediation and Interaction** Tyler VanderWeele

The book provides an accessible but comprehensive overview of methods for mediation and interaction. There has been considerable and rapid methodological development on mediation and moderation/interaction analysis within the causal-inference literature over the last ten years. Much of this material appears in a variety of specialized journals, and some of the papers are quite technical. There has also been considerable interest in these developments from empirical researchers in the social and biomedical sciences. However, much of the material is not currently in a format that is accessible to them. The book closes these gaps by providing an accessible, comprehensive, book-length coverage of mediation.

The book begins with a comprehensive introduction to mediation analysis, including chapters on concepts for mediation, regression-based methods, sensitivity analysis, time-to-event outcomes, methods for multiple mediators, methods for time-varying mediation and longitudinal data, and relations between mediation and other concepts involving intermediates such as surrogates, principal stratification, instrumental variables, and Mendelian randomization. The second part of the book concerns interaction or "moderation," including concepts for interaction, statistical interaction, confounding and interaction, mechanistic interaction, bias analysis for interaction, interaction in genetic studies, and power and sample-size calculation for interaction. The final part of the book provides comprehensive discussion about the relationships between mediation and interaction and unites these concepts within a single framework. This final part also provides an introduction to spillover effects or social interaction, concluding with a discussion of social-network analyses.

The book is written to be accessible to anyone with a basic knowledge of statistics. Comprehensive appendices provide more technical details for the interested reader. Applied empirical examples from a variety of fields are given throughout. Software implementation in SAS, Stata, SPSS, and R is provided. The book should be accessible to students and researchers who have completed a first-year graduate sequence in quantitative methods in one of the social- or biomedical-sciences disciplines. The book will only presuppose familiarity with linear and logistic regression, and could potentially be used as an advanced undergraduate book as well.

### **From reader reviews:**

#### **Terry Carr:**

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each reserve has different aim or perhaps goal; it means that e-book has different type. Some people really feel enjoy to spend their a chance to read a book. They are really reading whatever they consider because their hobby is actually reading a book. Think about the person who don't like reading through a book? Sometime, man feel need book once they found difficult problem or perhaps exercise. Well, probably you'll have this Explanation in Causal Inference: Methods for Mediation and Interaction.

#### **Cari Sexton:**

This Explanation in Causal Inference: Methods for Mediation and Interaction are usually reliable for you who want to be described as a successful person, why. The reason why of this Explanation in Causal Inference: Methods for Mediation and Interaction can be one of the great books you must have is giving you more than just simple examining food but feed you with information that probably will shock your preceding knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions throughout the e-book and printed types. Beside that this Explanation in Causal Inference: Methods for Mediation and Interaction giving you an enormous of experience like rich vocabulary, giving you tryout of critical thinking that could it useful in your day pastime. So , let's have it and enjoy reading.

#### **Carmel Smith:**

That publication can make you to feel relax. This particular book Explanation in Causal Inference: Methods for Mediation and Interaction was multi-colored and of course has pictures on there. As we know that book Explanation in Causal Inference: Methods for Mediation and Interaction has many kinds or type. Start from kids until youngsters. For example Naruto or Detective Conan you can read and think you are the character on there. So , not at all of book tend to be make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading which.

#### **Ashley Gibson:**

Some people said that they feel bored stiff when they reading a book. They are directly felt it when they get a half portions of the book. You can choose the particular book Explanation in Causal Inference: Methods for Mediation and Interaction to make your own reading is interesting. Your personal skill of reading skill is developing when you like reading. Try to choose easy book to make you enjoy to read it and mingle the feeling about book and reading especially. It is to be initially opinion for you to like to available a book and read it. Beside that the guide Explanation in Causal Inference: Methods for Mediation and Interaction can to be your friend when you're sense alone and confuse in doing what must you're doing of the time.
