Fans of the televised soap opera fans know the phenomenon of a flashforward very well. One day little Johnny is five-years-old, when he leaves for summer camp and the next time we see the kid, he's aged twenty years and he is now a hunky young man. The oddity truly defies the natural laws of aging and physics, but it isn't such a bad thing, because the occurrence usually means the character has been adapted in order to accelerate a higher-profile story. The concept of a floating timeline is a device used in fiction, particularly in soap opera storylines, to explain why characters might age very rapidly, despite real world markers or the other characters who appear to have aged extremely well or very little at all, in comparison to their offspring. Being that the Drama District publications are proud to oblige most of the traditional soap opera disciplines, it was only natural that we would use the device to flashforward the characters of George Arnaz Ebert (Gio) and Beau Austin Vanderglass in the Medicine Man novelizations, in order to complete the saga in a satisfying manner. Book Five: Wayward Sons wraps up the Medicine Man saga, by time-jumping twenty-plus years into the future, where tragedy and triumph continue to challenge our heroes in life altering ways.
