Stephen P. Hubbell

The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) Stephen P. Hubbell

Despite its supreme importance and the threat of its global crash, biodiversity remains poorly understood both empirically and theoretically. This ambitious book presents a new, general neutral theory to explain the origin, maintenance, and loss of biodiversity in a biogeographic context.

Until now biogeography (the study of the geographic distribution of species) and biodiversity (the study of species richness and relative species abundance) have had largely disjunct intellectual histories. In this book, Stephen Hubbell develops a formal mathematical theory that unifies these two fields. When a speciation process is incorporated into Robert H. MacArthur and Edward O. Wilson's now classical theory of island biogeography, the generalized theory predicts the existence of a universal, dimensionless biodiversity number. In the theory, this fundamental biodiversity number, together with the migration or dispersal rate, completely determines the steady-state distribution of species richness and relative species abundance on local to large geographic spatial scales and short-term to evolutionary time scales.

Although neutral, Hubbell's theory is nevertheless able to generate many nonobvious, testable, and remarkably accurate quantitative predictions about biodiversity and biogeography. In many ways Hubbell's theory is the ecological analog to the neutral theory of genetic drift in genetics. The unified neutral theory of biogeography and biodiversity should stimulate research in new theoretical and empirical directions by ecologists, evolutionary biologists, and biogeographers.

From reader reviews:

Irving Brehm:

This The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) book is not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is usually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) without we understand teach the one who examining it become critical in thinking and analyzing. Don't possibly be worry The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) can bring once you are and not make your tote space or bookshelves' become full because you can have it in your lovely laptop even cellphone. This The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) having fine arrangement in word along with layout, so you will not really feel uninterested in reading.

Damon Smith:

The book untitled The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) contain a lot of information on that. The writer explains the woman idea with easy technique. The language is very simple to implement all the people, so do definitely not worry, you can easy to read this. The book was authored by famous author. The author provides you in the new period of time of literary works. It is possible to read this book because you can read on your smart phone, or program, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site along with order it. Have a nice learn.

Vickie Duke:

Don't be worry when you are afraid that this book will certainly filled the space in your house, you may have it in e-book way, more simple and reachable. This kind of The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) can give you a lot of buddies because by you looking at this one book you have point that they don't and make anyone more like an interesting person. This book can be one of a step for you to get success. This book offer you information that possibly your friend doesn't recognize, by knowing more than additional make you to be great men and women. So , why hesitate? Let me have The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology).

Francis Corder:

What is your hobby? Have you heard this question when you got students? We believe that that query was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And also you know that little person just like reading or as examining become their hobby. You have to know that reading

is very important and also book as to be the factor. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You get good news or update in relation to something by book. Numerous books that can you choose to use be your object. One of them is actually The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology).
