The Medical Basis for Radiation-Accident Preparedness: Medical Management: Proceedings of the Fifth International REAC/TS International REAC/TS Symposium on the Medical Basis for Radiation-Accident Preparedness

This book includes some of the most renowned medical radiation experts from around the globe sharing case studies and research along with cutting-edge technologies and procedures for diagnosing and treating radiation injuries and illnesses captured from Fifth International REAC/TS Symposium on the Medical Basis for Radiation-Accident Preparedness. The compilation of this information from 37 expert presenters and more than 100 authors of scientific papers does not exist anywhere else; topics ranged from the Fukushima radiation disaster, radiation stem cell therapy, using ultrasound for diagnosis of radiation injury to practical radiation medical applications-just to name a few. REAC/TS hosted the symposium and has published the proceedings as The Medical Basis for Radiation-Accident Preparedness: Medical Management--Proceedings of the Fifth International REAC/TS Symposium on the Medical Basis for Radiation-Accident Preparedness and the Biodosimetry Workshop. This symposium attracted almost 200 participants from 18 countries who came to hear these experts discuss the advances in the diagnosis and management of radiation emergencies and illnesses. This book also includes proceedings from a biodosimetry workshop that followed the symposium and featured a number of discussions related to basic, translational and clinical research involving use of multiple biodosimetry assays for radiation injury and dose assessment.
