How-to-Grow World Class Giant Pumpkins III Don Langevin

The reader will find much in this third book in a trilogy of information on growing giant pumpkins. How-to-Grow World Class Giant Pumpkins, III presents the newest information on cultural methods, who's who, and records. New ideas about plant size and pruning strategies throw a whole new light on the grower with only a small area to devote to giant pumpkins. New discoveries involving the use of considerably more calcium in feeding programs, a steadily growing consensus on the use of nitrogen, the beginnings of a real effort at applying genetic theory in pollination strategies, how-to select the best seed, and the controversial subject of genetic manipulation, all required an airing-out here.

The explosion in the number of growers gathering information via the internet, either through website information, or through open forums with other growers via message boards, has become a major accelerator in the learning curve of all growers. Seed auctions, message boards, and a site devoted entirely to maintaining a database of pumpkin genetic backgrounds, all contribute to a shortening of the time it takes to succeed in this sport. I would be remiss if I did not spend the time to write about these valuable resources, and convey any new discoveries to you.

If you want to grow a world record giant pumpkin, you will find much in this book to to help you.

If your goal is 1500 pounds, then you've come to the right place.
